

Optimise your card payments ecosystem

Accept payments online with Apple Pay, Google Pay and all major credit and debit cards. Take advantage of multiple acquirers and optimise recurring payments processing with network tokens.

CARD PAYMENT FLOW

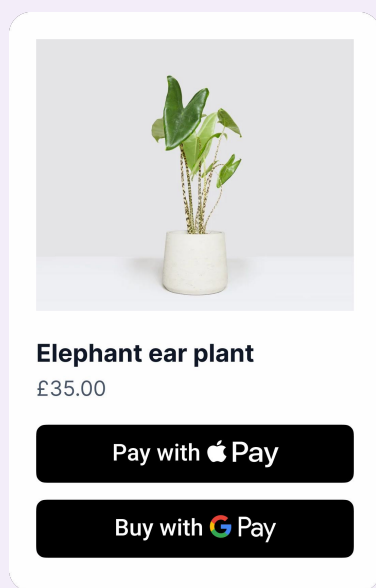

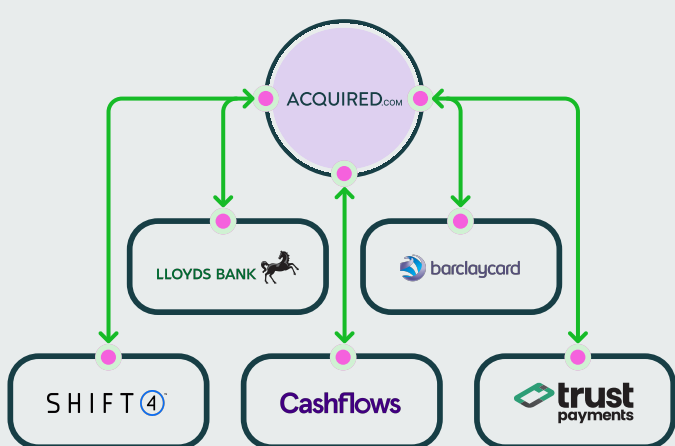

Multi-acquirer approach

Acquired.com is an acquirer-agnostic gateway offering access to five acquirers through a single integration. Process payments and access outcomes and reporting for all five acquirers via the Acquired.com platform.

Maintain a resilient and flexible payments ecosystem by taking advantage of Acquired.com's strategic relationships with acquirers.

- ✔ Avoid downtime and optimise conversion rates by balancing and routing transactions via different acquirers.
 - ✔ Uninterrupted service in the event of acquirer failure or downtime.
 - ✔ Share the load to improve throughput performance and reliability.
 - ✔ Use the acquirer with the best performance for your business, region or card network.
 - ✔ Auto-retry logic across acquirers to boost acceptance rates.
- + Receive unified data feeds across acquirers for disputes & frauds, and reconciliation data. Making it easy to manage and report on transactions in a single view.

Digital wallets

Reduce friction and increase conversion

- No manual entering of card details, or billing and shipping information
- Tokenisation and biometric authentication like Touch ID or Face ID to enhance security
- Encrypted payment authorisations to reduce fraud
- Supported for single and recurring payments

Available via the Acquired.com API, Components, Hosted Checkout, Payment Links and shopping cart plugins.

Recurring payments

Accept recurring payments without interruption with Network Tokens.

- Automatically updated
- Secure fraud protection
- Improves authorisation rates
- Backed up by Account Updater

3% average improvement in success rates when using network tokenisation

How network tokenisation works

Acquired.com works with card networks like Visa and Mastercard to replace card numbers with a unique token in all parts of the payment process. In the event your customer's card is lost, stolen or expired, the network token remains usable and will update with the new card details in real time.

If your business processes recurring payments you can benefit from enhanced security, better conversion, and reduced costs.

Data & insights

Understanding your business' transactions is important. Acquired.com provides the data and tools to help you understand exactly what's happening with your payments.

- ✔ Real-time transaction monitoring
- ✔ Enhanced response codes
- ✔ Dispute and fraud feeds
- ✔ Daily reconciliation data

Support your customers by providing transaction insights in real time, and use our enhanced response code data to prevent potential transaction failures.

Get access to the data which impacts your bottom line. Identify and analyse trends to make data driven decisions.

A complete card processing platform

Get the most out of your card processing with modern payment methods, processing solutions and data access
